

Valor Technologies is a global SDVOSB-certified professional services company. In addition to being proudly Veteran-owned, ValorTech is also SOC2-certified and a VIP graduate. We offer a wide array of solutions, including strategy development, custom IT services, cybersecurity, risk and vulnerability management, information assurance, operations consulting, software development, and R&D. Our specialization lies in crafting customized data solutions for both government and enterprise clients, with proficiency in XDR, SIEM, and SOC services, as well as full-service help desk and call center operations, and robust Backup, Disaster Recovery, and Business Continuity (BUDR/BC) services. Our team, fully certified and background-checked, excels in all the technologies we support. We succeed by integrating industry standards, educational expertise, military backgrounds and extensive experience to create a comprehensive IT strategy tailored to your specific needs.
